Education

Thakur College of Engineering and Technology

Bachelor of Engineering in Information Technology

Aug. 2023 – Present

CGPA - 9.29

Experience

ThinkAct AI

Fullstack Engineer Intern

July 2025 – Jan 2026

Remote – New Jersey, United States

- Designed multi-tenant RBAC with Auth0 across 10+ user roles, integrating role-specific SendGrid onboarding flows that reduced signup time by 40% for a mortgage workflow automation platform.
- Configured wildcard SAN SSL on AWS EC2 for dynamic tenant domains and Dockerized the Next.js, NestJS, and Django/Ollama stack, including semantic-search infrastructure for LLM-based document retrieval.
- Built an 8-language UI layer and WebSocket-based conversation system with real-time translation, synchronizing platform conversations with email which increased base-customer coverage and was appreciated during demos.

Vighnotech

React Native Intern

Sept 2024 – Jan 2025

On-Site – Mumbai, India

- Built an Android fintech app in Expo from Figma designs, integrating OAuth2 Gmail access and Android SMS APIs to aggregate user financial data into a vendor CRM interface.
- Implemented client-side PDF generation for CRM and inventory workflows, reducing server load and configuring nightly builds for QA validation.

Technical Skills

Languages: C++, Java, JavaScript, Python, SQL, Dart — HTML, CSS, YAML

Developer Tools: Figma, VS Code, Git, Android Studio, Docker, AWS, Azure, AI APIs

Databases: MongoDB, PostgreSQL, Redis, MariaDB

Technologies/Frameworks: NextJS, Node.js, NestJS, Flutter, Expo, Docusaurus, Auth0, GitHub Actions

Coursework: Data Structures, OOP, DBMS, Computer Networks, Operating Systems

Projects

NativeFlow | TypeScript, GitHub Actions, Docusaurus, React, Markdown, RTL, NPM

[GitHub](#) | [Live](#)

- An utility-first styling library for React Native, enabling Tailwind-like styling but using objects.
- Wrote Docusaurus documentation with live Expo examples and made a VS Code Intellisense extension for dev-exp.
- Benchmarked only 8% slower than the native StyleSheet API, crossing 50k+ downloads on NPM.

Veda Assessments | TypeScript, NestJS, React, DeepSeek Vision, MongoDB, Azure, Tailwind CSS

[GitHub](#) | [Live](#)

- An AI-assisted grading platform for teachers to process question papers and map student answer sheets.
- Integrated DeepSeek Vision and Azure Storage to extract question distributions.
- Highlighting feature using box-bounding and human-first AI workflow for grading answer sheets with AI Assistance.

SICK | React Native, TypeScript, GitHub Actions, Solana, Phantom/Tiplink Wallets, Gemini, Figma

[GitHub](#) | [Demo](#)

- A decentralized crypto investment app with copy trading, TipLink for wallet-less onboarding.
- Used CoinGecko and Jup.ag for live pricing with Gemini-based market analysis and a creator loyalty reward system.

binqr | Flutter, Dart, Vite, Figma, QR Encoding, MD5 Checksum

[GitHub](#) | [Live](#)

- Connection-free file transfer for android and desktop using QR codes as a medium.
- Chunked files into 800-byte MD5-verified QR payloads flashed at 10 QR/sec with auto-retry on bad scans.
- Built a matching Web UI which only supports Send functionality with cross-device support.

Achievements

- Solved 450+ Data Structures and Algorithms problems on leetcode.com/u/jayowiee and gfg.org/profile/jaysingh1109.
- Problem Setter at TCET Shastra Coding Club, creating 10+ problems for college CP competitions.
- Recognized as a Top Contributor by The Odin Project, an open-source education initiative.
- Awarded a monetary grant by CoinDCX India for SICK, a Solana-based crypto investment app.
